MOHAMED OSAMA

Product Designer & Front-End Engineer

Cairo, EG | @mohamedosama

github.com/mohamedosama209750 | linkedin.com/in/mohamed-osama-936244333

PROFILE

I'm a product designer and front-end engineer with eight years of experience turning fuzzy ideas into shipped software. My sweet spot is the overlap between visual craft and engineering: design systems, motion, and interfaces that feel alive without getting in the way.

Lately I've been exploring depth and translucency on the web - glass surfaces, layered light, and micro-interactions that make a screen feel physical. When I'm not pushing pixels, I'm trail running or perfecting a pour-over.

8+
Years designing & building

40+
Products shipped

12
Design awards

CORE SKILLS

React & TypeScript / Design systems / Motion & interaction / Accessibility / Product strategy / Prototyping

Tools: React / TypeScript / CSS / Vite / Figma / Framer Motion

SELECTED PROJECTS

Aperture — Lead designer & engineer — 2025

A glass-forward analytics workspace that turns dense product data into calm, glanceable stories.

Lumen — Design engineer — 2024

A lighting-control companion app with spatial controls, ambient presets, and a tactile motion language.

Field Notes — Solo build — 2023

An offline-first writing tool for researchers, built around a command palette and beautifully quiet typography.
